

Why we are against license plate reader cameras (ALPR/LPR/Flock/Axon) and data centers of the 1984 “Big Brother” NWO Surveillance State

-ALPR/LPR license plate readers (cameras) are unconstitutional via the U.S. constitution and the state of Tennessee constitution. Therefore, they are illegal.

-They are an invasion of our privacy.

-Bill Gates has repeatedly declared that there will be another, but much larger world/global epidemic/pandemic disease in which the movement of the population/citizens must be totally controlled. There will be a repeat of not being allowed to visit your dying relatives in the hospital, not being able to walk in secluded parks/beaches/forests or your own property or public sidewalks, not being allowed to go anywhere without government permission.

-Police in many different states have been found guilty of using the ALPR/LPR camera databases to spy on and stalk ex-girlfriends, family, relatives and personal enemies. The misuse and abuse of these systems is widespread and can't be prevented. You can't pay the wolf to guard the flock of sheep.

-ALPR/LPR companies such as Flock/Axon have been found to repeatedly lie and misrepresent their product and the data and statistics. They can't be trusted.

-ALPR/LPR companies sell/share our information with third parties without our permission or knowledge.

-Mass surveillance of the entire population, innocent law abiding citizens in order to capture only a FEW criminals is not logical and is a major intrusion of our legal rights on multiple levels.

-After these systems become mainstream long-term, they can and will be used by the communist regimes to control Americans in the very same way that they already control the population of China.

-Flock/LPR/ALPR cameras do not reduce/prevent crime. Flock has misrepresented the numbers. They are selling their cameras to local police departments via deceptive practices, lying about the data. Any criminal caught via the cameras, could also be caught by hiring more patrol police officers and better training and better policing priorities.

-ALPR cameras are unconstitutional searches without warrants. Therefore the police need to obey the law!

-ALPR/LPR cameras are being placed facing gun shops/stores (to build databases of gun owners), private residences, children splash pads and churches.
